

Complete Feature Overview

Digital Logbook • DZ Management • AFF Training • GPS Tracking

skydivelog.pro

2026

Personal Logbook

Complete digital jump log compliant with USPA SIM 3-1 C requirements. Everything you need to document your skydiving career.

Unlimited Jumps

No jump limit, even on the free plan. Your complete skydiving career in one place, from jump #1 to #10,000.

USPA SIM 3-1 C Compliant

All 12 required fields (number, date, DZ, aircraft, gear, altitudes, freefall time, type, description, signatures). Accepted by USPA as a digital logbook.

Digital Signatures

Instructors and coaches sign digitally with verified identity (name, rating, certificate number). Signed entries are locked — data integrity guaranteed.

PDF Export

Export your logbook for printing in federation-compliant format. Ready to present at license verification.

Multi-DZ Support

Log jumps from any drop zone worldwide. One logbook, unlimited locations.

Offline Mode

Full logbook access without internet. Data syncs automatically when connection is restored.

Jump Notes & Comments

Detailed debrief notes per jump, plus comments from friends and instructors. Social feedback in your logbook.

Photo & Video

Attach photos and video links to any jump entry. Complete documentation of every skydive.

Jump Sharing

Share selected jumps with friends or publicly. Show your progress on social media.

Jump Verification

Verified signatures from authorized personnel (Coach, Instructor, Examiner, S&TA) with rating validation.

Equipment Tracking

Manage your personal gear with complete service history, automatic jump counters, and expiry alerts.

Equipment Manager

Add and manage your gear: container, main canopy, reserve, AAD, helmet, jumpsuit, altimeter. Everything tracked in one place.

Automatic Jump Counters

Automatic jump counting per gear item. Know exactly how many jumps your canopy has.

Repack & Service Alerts

Notifications for upcoming repack deadlines, AAD service intervals, and gear inspections. Never miss a deadline.

Service History

Complete history of repacks and services with dates, descriptions, and the person who performed them.

Damage Reporting

Log gear damage with photos and description. Track status from reported through repair to return-to-service.

Wing Loading Calculator

Calculate canopy wing loading based on exit weight and canopy size. Auto-fills body weight from your profile and canopy size from Equipment Manager. 8 safety categories with visual guidance.

GPS Tracking & 3D Visualization

Import GPS files from any device and visualize your jump in stunning 3D. Analyze every second of your freefall.

GPS File Import

Import files from FlySight, FlySight 2, ProTrack II, AltiTrack, GPX, KML. Upload from your device and see your jump in detail.

3D Trajectory View

Interactive 3D visualization of your jump trajectory over real terrain using CesiumJS. Rotate, zoom, analyze every phase.

Speed & Altitude Analysis

Vertical and horizontal speed charts, glide ratio, altitude profile second by second. FlySight-level data analysis from your browser.

Google Earth Export

Export trajectory as KML/KMZ for Google Earth. Open your jump in 3D and share with others.

Wind Tunnel Logbook

Dedicated logbook for indoor skydiving sessions with coaches, exercises, and total time tracking.

Tunnel Session Log

Separate logbook for tunnel sessions. Record date, facility, time, exercises, and coach.

Total Tunnel Time

Cumulative time counter for all tunnel sessions. Track your indoor flying progress.

Exercise Categories

Categorize sessions by discipline: belly, sit-fly, head-down, dynamic, VFS. See exactly how you've invested your tunnel time.

Tunnel Coach

Assign a coach to each session. Your complete coaching history in one place.

Documents & Certificates

Store all your important documents with automatic expiry alerts. Never jump with an expired medical again.

Document Storage

Store licences, medicals, insurance, and certificates. All your important documents in one place.

Expiry Alerts

Automatic notifications when documents approach expiry. No more surprises at the gate.

Multi-Federation Licences

Support for licences from multiple federations simultaneously (USPA + BPA + DFV + FFP + KNNvL + RFAE + ANPd'I + AeCP + FASU + Aeroklub Polski + FAI CoP). One profile, all qualifications.

Document Scan Upload

Upload scans of your documents. Have them always with you — on your phone, paperless.

Camera Document Capture

Take a photo with your phone and upload directly — documents, damage, certificates. Works everywhere uploads work.

Statistics & Progress

Detailed analytics of your skydiving career with trend charts, self-assessment tools, and performance radar.

Advanced Statistics

Trend charts, jump type breakdowns, weekly/monthly/yearly activity. Visualize your entire skydiving career.

Self-Assessment Ratings

Rate your jump in 6 categories (exit, docking, formation, breakoff, altitude awareness, landing). Track improvement over time.

Radar Performance Chart

Radar chart of your strengths and weaknesses based on self-assessments. Always know what to work on.

Personal Records

Track your personal bests: highest exit, longest freefall, fastest speed. Your milestone history.

Community & Social

Connect with other jumpers, share achievements, and build your skydiving network.

Friends System

Add fellow jumpers as friends. See their jumps, stats, and progress.

Jump Partners

Tag who you jumped with. Your partner confirms — verified record of shared jumps.

Skydive Groups

Create groups (freely team, DZ crew, AFF group).
Announcements, jump planning, coordination.

Messenger

Built-in messenger. Message friends and instructors without leaving the app.

Public Profile

Public profile with your stats, ratings, and achievements. Your skydiver business card.

AFF Instructor Tools

Complete AFF training management system supporting 11 international training programmes.

AFF Training Panel

Dedicated instructor dashboard. Student list, progression tracking, AFF jump history, level-by-level assessments. The only tool of its kind.

Levels 1-8 Tracking

Track student progress through each level with skills checklist (stability, altitude awareness, pulls, turns, tracking). Pass/repeat per skill.

Multi-Programme Support

Eleven training programmes in one system: USPA ISP, British Skydiving, DFV Ausbildung, FFP PAC, KNVvL, Aeroklub Polski, APF, RFAE, ANPd'I, AeCP, FASU.

Student Assessments

Grade each student after every jump: skills checklist, notes, pass/repeat/hold recommendation.

AFF Certificates

Automatic PDF certificate generation on course completion. With instructor signature and date.

Coaching Analytics

Training statistics: average completion time, repeat rate per level, training quality trends. A tool for instructors to improve their method.

Signature Validation

System verifies that the signing person has the required rating (AFF-I, Coach, TI, AI, CSI). No rating = no signature.

Instructor Rating Training Module

Complete qualification tracking for all 11 federations: USPA, BPA, DFV, FFP, KNVvL, RFAE, ANPd'I, AeCP, FASU, AP, APF. Ratings: Coach, AFF-I, TI, I/E, S&TA, Sprunglehrer, Moniteur, and more.

Module-by-Module Assessment

Examiner assignment, per-module grading, and digital audit trail for every instructor qualification path.

Instructor Document Library

Federation-specific document library per instructor rating. Upload, organise, and access required materials per federation.

Skills Matrix Analytics

Pass rate per training module, examiner performance, and training quality trends across all instructor rating programmes.

Federation-Specific Boarding Checklists

DZ compliance checklists tailored to each federation (DFV, FFP, KNVvL, USPA, BPA, RFAE, ANPd'I, AeCP, FASU, AP, APF) with per-jump-type verification.

AFF Skills Checklists

Structured per-level skills checklist (stability, altitude awareness, pulls, turns, tracking) evaluated after every AFF jump.

AFF Consolidation Jumps

Track consolidation jumps between AFF levels. System recognises and counts them toward progression automatically.

AFF Course Groups

Organise AFF students into named groups (e.g. Summer Camp 2025). Bulk view, group filtering, and group-level reporting.

Student Self-Join via Invite Link

Instructor generates a unique invite link. Student scans it and is instantly enrolled in the course — no manual admin.

DZ Students Overview

DZ Manager sees all AFF students grouped by instructor: pass rate, current level, last activity, on-hold status.

Instructor Course Permissions (Enterprise)

DZ Manager controls which instructors can create DZ-linked courses. Guest instructors or community members are restricted from creating official DZ courses.

Federation Instructor Ratings

Store and display instructor ratings per federation (AFF-I, TI, Coach, I/E, S&TA, Sprunglehrer, Moniteur). Verified during AFF signature validation.

Instructor Rating Training Module

Enterprise-exclusive module for managing instructor qualification programmes across 11 international federations.

Instructor Rating Training Module

Complete qualification tracking for instructors from 11 federations: USPA (Coach, AFF-I, TI, I/E, S&TA), BPA (AI, Tandem, AFF), DFV (Sprunglehrer), FFP (Moniteur), KNVvL, RFAE, ANPd'I (Monitore), AeCP, FASU, Aeroklub Polski, APF. The only DZ software to offer this — Enterprise exclusive.

11-Federation Course Management

Create instructor qualification courses with examiner assignment per federation. Track progress through all rating programmes side by side.

Module-by-Module Assessment

Each training module graded separately: PASSED / REPEAT / FAILED. Examiner assigns assessment with notes. Real-time progress bars for every candidate.

Instructor Document Library

Federation-specific document storage per instructor rating. Upload, organise, and access manuals, syllabi, and certification documents per federation and per rating type.

Skills Matrix Analytics

Pass rate per training module across all candidates, examiner performance comparison, training quality trends. Data-driven instructor programme management.

Digital Audit Trail

Complete immutable log of every course action: who assessed what, when, and what was the result. Satisfies federation audit requirements.

Dual Role Support

An instructor can be simultaneously a candidate (being trained) and an examiner (training others). System handles both views correctly.

Enterprise-Only Access

Instructor Rating Module is exclusively available on DZ Enterprise plan — a key differentiator for professional drop zones.

Drop Zone Operations

Complete drop zone management platform — from the load board to financial reporting.

Live Load Board

Digital manifest with real-time sync. Create loads, assign jumpers, manage slots. Live statuses: planned -> boarding -> airborne -> completed.

Weight & Balance

Automatic calculation of total jumper weight and centre of gravity per load. Flight safety compliance.

Boarding Management

Boarding list with check-in status per jumper. Manifest knows who is ready and who's running late.

Self-Manifest (Enterprise)

Jumpers sign themselves onto loads from their phones. Less work for manifest, faster throughput.

DZ Staff Management

Internal login panel for DZ staff (Pilot, Rigger, Receptionist, Packer). Role-based access separate from the main jumper app.

Admin Panel

Full DZ overview: user management, operational statistics, staff activity, and system configuration in one place.

Tandem Booking

Online tandem booking system: calendar, packages (solo/video/photo/premium), vouchers, waiting list.

Digital Waivers

Electronic liability waivers signed before the jump. Paperless, timestamped, archived, GDPR-compliant.

DZ Equipment Fleet

Manage your entire equipment fleet: student, tandem, sport rigs. Status, location, full history.

Repack Tracking

Track repack due dates for every rig in the fleet. Automatic alerts. Your rigger always knows what's due.

Personnel Management

Manage DZ staff: instructors, pilots, packers, manifest, reception. Roles and granular permissions.

Staff Audit Log (Enterprise)

Who changed what and when. Complete operational history — full transparency and accountability.

Rotation System (Enterprise)

Automatic tandem instructor rotation. Fair workload distribution.

Finance & POS

Financial module: pricing, ticket sales, jumper account balances, daily and monthly reports.

Payroll Reports (Enterprise)

Automated earnings calculation per instructor/pilot/rigger based on completed jumps/flights/repacks.

Events & Ticketing

Organize boogies, camps, competitions. Online registration, ticketing, results. Referral programme.

Analytics Dashboard

Operational dashboards: jumps per day, type breakdown, revenue trends, aircraft utilization.

API Access (Enterprise)

REST API for integration with external systems. Webhooks and automations for advanced workflows.

Multi-Location (Enterprise)

Manage multiple drop zones or landing areas from one panel.

White-Label (Enterprise)

Your own logo, colours, name in the interface. The system looks like yours.

Pilot App — Live Altitude

Dedicated pilot interface showing live jumper altitude, load status, and current conditions. Separate access from the main manifest panel.

Weather Board

Live weather data and forecast displayed on the DZ board screen. Includes conditions, wind speed, and 24-hour forecast for the field.

Boarding Compliance Checks

Pre-board compliance verification per jump type (tandem, AFF, coach): equipment, documents, licences, medicals. Boarding blocked if non-compliant.

Cart Recovery (Enterprise)

Automatic follow-up for incomplete tandem bookings. Recover lost customers with timed reminder emails.

Packer Module

Dedicated packer workflow: claim rigs, log pack jobs, track earnings. Built into the DZ staff panel with role-based access.

Packer Earnings & Accountability

Automatic earnings calculation per pack job. Complete accountability trail — who packed what and when.

Rig Operational Status

Real-time operational status per rig: ready, in-use, under repair, quarantined. Full fleet visibility at a glance.

Subzones & Multi-Location (Enterprise)

Manage multiple drop zones or landing areas (grass, accuracy, student zone) from one Enterprise account. Separate manifest per zone.

Event Ticketing & Referral

Sell event tickets online. Built-in referral programme with unique codes and automatic commission tracking.

Jumper Database & Document Verification

Central jumper registry with licence tracking, medical expiry, document uploads, and QR-code document verification. Ban management included.

Walk-In Jumper Registration

Add jumpers without accounts directly to a load. For tandems, coaches, or guests without the app.

Move Between Loads

Drag and drop jumpers between active loads. Instant reallocation without re-entering data.

Load Sheet PDF

One-click PDF of the complete load: names, gear, tandem assignments, weights. Print or share instantly.

Metric / Imperial Toggle

Switch the entire DZ between metric and imperial. Altitude in feet or meters, weight in kg or lbs — consistent across manifest, weather, and equipment.

Quick Mode (Mobile Panel)

Role-based full-screen mobile dashboard for DZ staff. Manifester, Pilot, Rigger, Receptionist, Load Checker — each gets a focused interface in one tap.

Board Screen Themes

Customise the public load board with your DZ colours and dark/light/custom theme. Looks professional on the drop zone TV screen.

DZ Branding & Logo

Upload your DZ logo and set brand colours. Applied across the booking page, load board, and certificates.

Role-Based Invitation System

Invite staff by role: Manifester, Pilot, Rigger, Packer, Receptionist, Load Checker. Each gets access only to their area.

Broadcast Messages (Enterprise)

Send instant messages to all DZ members or specific groups (instructors, packers). Announcements from the DZ panel.

Aircraft Assignment per Load

Assign a specific aircraft to each load. Tracks capacity, weight limits, and aircraft utilisation per day.

Push Notifications

Instant push alerts to jumper phones: boarding call, load status change, repack reminder.

Automated Email Notifications

Booking confirmations, repack reminders, document expiry warnings, waiver receipts. All sent automatically.

Weekly Document Digest

Automatic weekly email to DZ manager: all expiring documents, licences, and medicals in the next 30 days.

DZ Equipment Alert Dashboard

Centralised alert view for all DZ equipment: upcoming repacks, AAD service, damage reports. Nothing slips through.

Waiver QR Code Link

Generate a QR code for your waiver page. Print it on the reception desk or include in booking confirmation emails.

Tandem Passenger Management

Full passenger profile: weight, emergency contact, prior experience. Privacy protection — passenger data hidden from public load board.

Jump Packages (10-pack, Season Pass)

Sell discounted jump bundles. Automatically deducted from jumper balance per jump. Tracks remaining jumps.

Jump Pricing Configuration

Set prices per jump type (solo, tandem, AFF, coach jump). Applied automatically in POS and finance reports.

Packer Rate Overrides (Enterprise)

Set custom packing rates per rig type or individual packer. Override the default DZ rate for specific arrangements.

Pack Operations Analytics (Enterprise)

Track packing throughput, average time per pack job, and packer performance across the season.

DZ Jumper Alert System

Real-time alerts for expired licences, missing medicals, overdue repacks. Shown on the manifest panel before boarding.

Equipment Location Tracking (Enterprise)

Track the current location of each rig: in use, in packing room, in storage, or with a specific jumper.

Waiver Version Control

Every waiver update creates a new version. Existing signed waivers are archived. You always know which version was signed and when.

Jumper Prepaid Balance

Top up jumper accounts with cash or transfer. Deduct for jumps, gear rental, or POS purchases automatically.

POS Custom Categories

Configure your own POS categories: jumps, gear rental, courses, merchandise, food. Each with its own pricing and tracking.

Multi-Currency Support (17 currencies)

Operate in your local currency: PLN, EUR, USD, GBP, CZK, HUF, SEK, and 10 more. Consistent across POS, booking, and finance reports.

Packer Payout Management (Enterprise)

Track and export packer earnings per period. One-click payout summary for accounting.

Embeddable Booking Widget

Embed the tandem booking system directly on your own website as an iframe. Customers book without leaving your site.

Digital Signage — TV Board

Display the live load board on a TV screen at the DZ. Auto-refreshing, full-screen, with your branding.

Cross-DZ Guest Identity

Jumpers from other DZs are automatically matched by name and licence number. No re-registration needed for visiting skydivers.

Guest Instructor Management (Enterprise)

Add guest instructors for a boogie or camp. They get temporary DZ access and appear in the AFF instructor list.

Quiz & Knowledge Testing

Create knowledge quizzes for AFF students and jumpers. Track scores and use as a training milestone.

Cross-DZ Document Sharing

Jumpers can share their verified documents (licence, medical) with any DZ on the platform. No physical paperwork at check-in.

Anonymous Staff Login URL

DZ manager generates a unique token-based URL for staff login. Staff log in without knowing the DZ slug — URL can be rotated at any time.

Load Archive

Historical archive of all completed and cancelled loads. Filter by date, aircraft, or jump type. Full operational history at your fingertips.

Equipment Sets (Rig Sets)

Pre-configure rig sets for the manifest. Assign sets to load slots and track them during flight. Full accountability from claim to landing.

DZ Federation Memberships

Register your DZ as a member of USPA, BPA, FFP, DFV, KNVvL, RFAE, ANPd'I, AeCP, FASU, or other federations. Enables federation-specific compliance checks at boarding.

Self-Manifest Approval (Enterprise)

Manager confirmation step before a self-manifest request is accepted. Prevents unauthorised or premature load additions.

Plans & Pricing

Individual plans: FREE (logbook, basic gear), BASIC (all personal features), PRO (GPS, 3D, groups, tunnel), INSTRUCTOR (AFF panel, coaching analytics).

DZ plans: DZ STARTER (load board, manifest, basic AFF), DZ PROFESSIONAL (full booking, waivers, equipment, finance), DZ ENTERPRISE (all features, API, white-label, payroll, multi-location).

Platform

PWA (Progressive Web App) — works on every device without App Store

Offline mode — core features work without internet

10 languages: EN, PL, DE, CS, FR, NL, ES, PT, IT, UK

Metric / Imperial units toggle

Cloud-based, automatic backup, multi-device sync
